

Disabilities and Rehabilitation Project

Matilda is the manager for this project, having joined the Ripple Africa team in January 2017. Matilda has already made great progress with both existing patients and their families as well as identifying other children and adults with varying disabilities. To date there are over 120 children and their families benefiting from the service. Four groups have been established in four different areas to encourage children and their parents/guardians to meet together to share stories and suggestions, and to benefit from receiving and learning therapy techniques.

By donating to this project, you will be helping to support Matilda's work and your donation will help fund patient referrals, basic mobility aids, rehabilitation equipment, and transport.

A donation of £21 (\$30) provides vital support to three children and their families for a month.

A donation of £84 (\$110) provides vital support to a child and their family for a year.
