

Fruit Tree Planting

Helping communities to plant fruit trees

PROBLEM

- Rapid population growth and large families
- Poor diets and significant levels of malnutrition
- Low availability of fruit in local markets
- High levels of poverty with few opportunities to generate additional income

SOLUTION

- Provide community tree planting clubs with fruit tree seeds
- Educate them on setting up tree nurseries and caring for their seedlings
- Teach them how to plant the fruit trees out and care for them
- Support clubs to provide schools and vulnerable families with seedlings
- Ongoing support to ensure high yields from the fruit trees planted out
